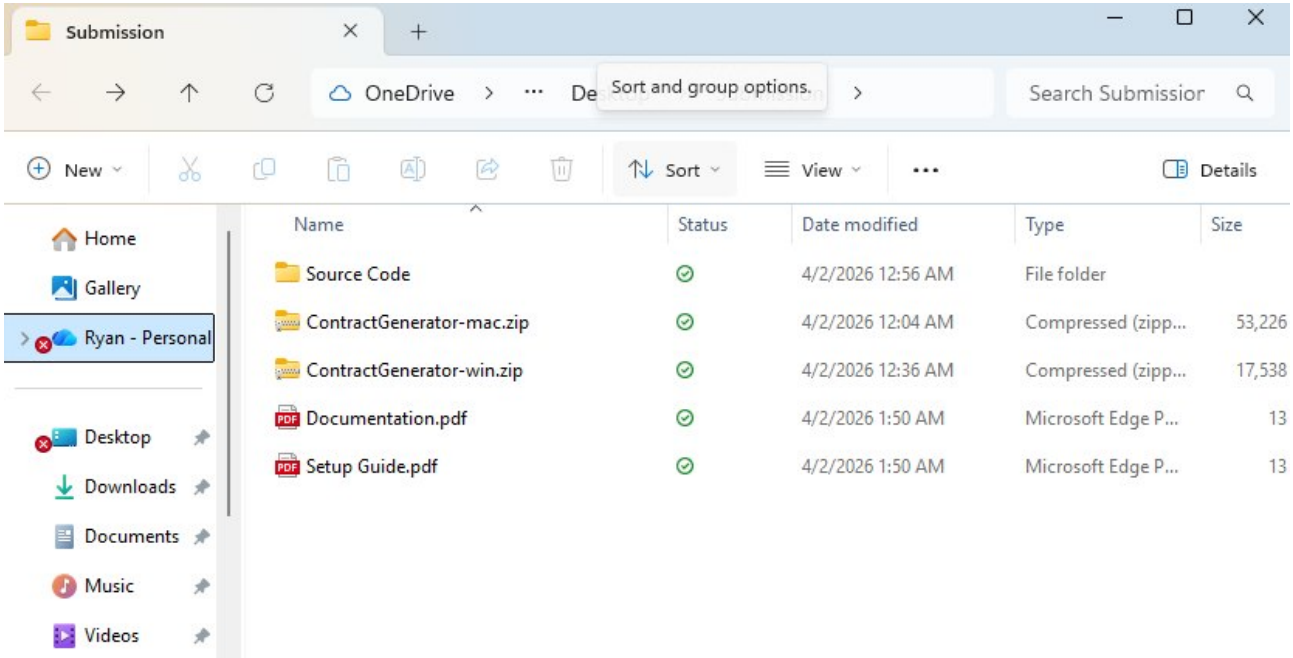
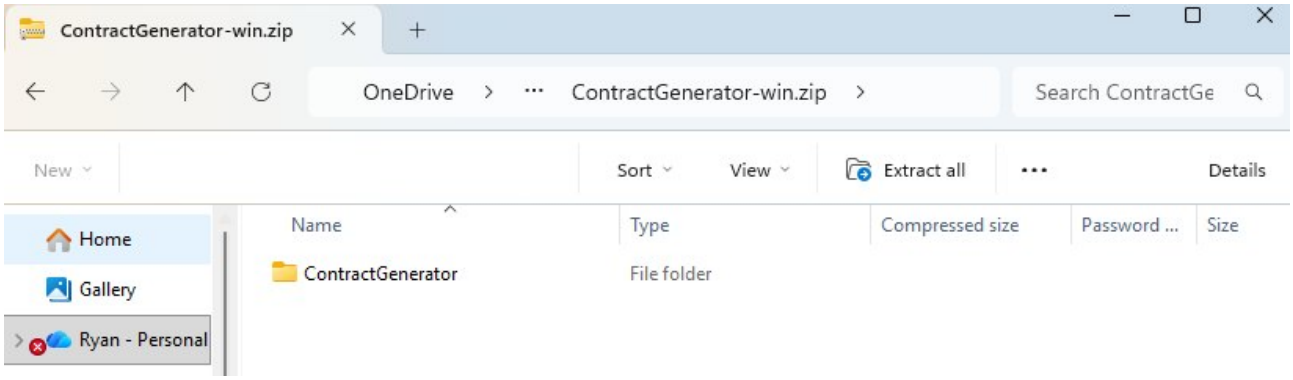
Setup Guide in 3 Steps

Step 1:



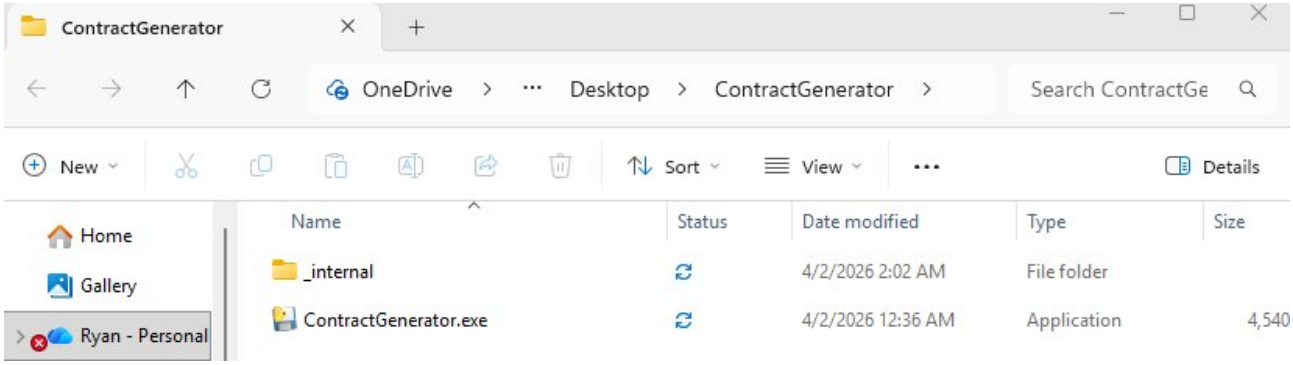
Within the Submission folder there are 3 software folders
If the device is MAC select the ContractGenerator-mac.zip
If the device is Windows select the ContractGenerator-win.zip

Step 2 (Windows):
If Windows this is what you should see:

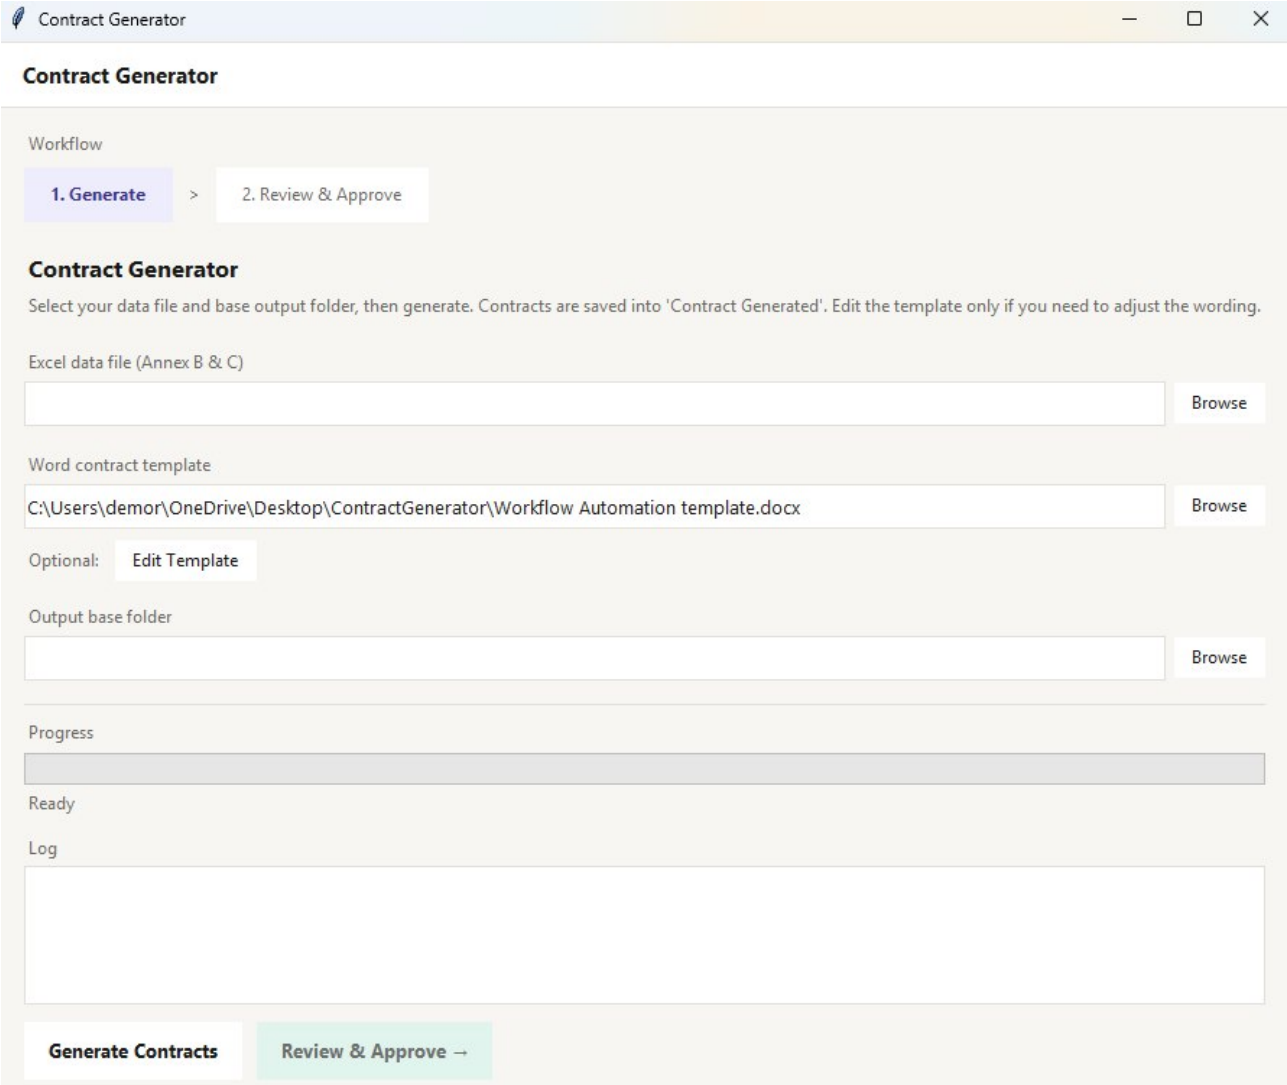


Extract the Folder to desktop and click into the folder

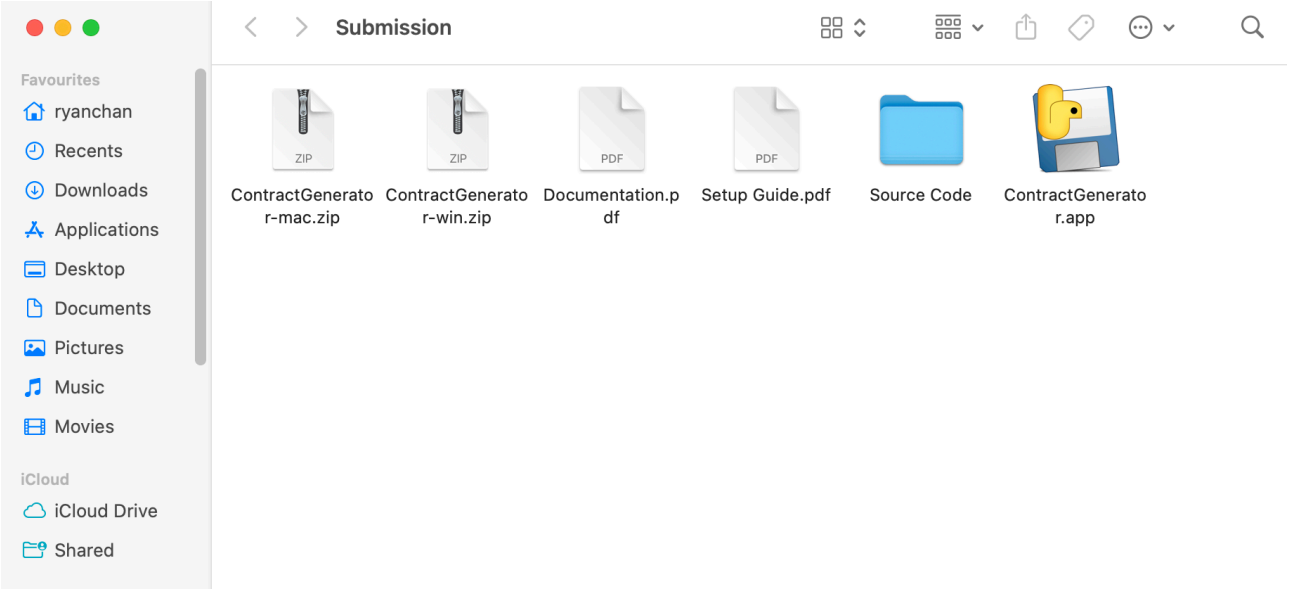
Step 3 (Windows):
Within the ContractGenerator Folder



Select ContractGenerator.exe and thats it! The software should show up



Step 2 (MAC):
After Selecting ContractGenerator-mac.zip



You should notice a ContractGenerator.app has been created
Click on it and thats it!

However Due to Apple's enhanced security, the app may be blocked. In this case the only method would be to have the app generated from within the user device. While possible, this would be slightly more tedious and therefore the steps for this procedure will be omitted.

However feel free to let me know if this information is needed.
